

Blast & Paint Services for Heavy-Duty Mining & Industrial Items

Chamber Highlights

- ✓ **Impressive Dimensions**
 - 8m long x 4m high x 4m wide.
 - Handles large industrial items with ease.
- ✓ **Precision Shot Blasting**
 - Removes rust, scale, and surface contaminants, preparing items for long-lasting finishes.
 - Steel Grit (GL40) blasting requires less time to achieve the required class of blast profile for each job.
- ✓ **Professional Painting Services**
 - Industrial-grade coatings designed to withstand harsh environments.
 - Specialised for mining, heavy machinery, and abrasion-prone equipment.
- ✓ **Eco-Friendly & Safe**
 - Low-dust operation for a cleaner, safer workspace.
 - Steel grit (GL40) are recyclable, minimising environmental impact.

Applications

Tailored for items Aligned with Alumina Tiling and More:

- ✓ **Chutes & Hoppers:** Ensures clean surfaces for proper tiling and abrasion resistance.
- ✓ **Pipes & Ducts:** Prepares internal and external surfaces for smooth operation and enhanced durability.
- ✓ **Screens & Separators:** Cleans and preps for re-coating or tiling to improve wear resistance.
- ✓ **Structural Components:** Girders, frames, and other large items used in mining and industrial setups.
- ✓ **Cyclones & Tanks:** Refurbish and protect against wear with specialized coatings.
- ✓ **Conveyor Frames & Rollers:** Preps for re-coating or additional wear liners.

Why Choose HIC Services?

Designed for Large Equipment: Perfect for items up to 8m x 4m x 4m. Specialised in Alumina Tile Prep & Tiling: Trusted for high-precision blasting that ensures perfect tile adhesion by our on-site tiling team.

- **Industrial Expertise:** Over 30 years of experience specialising in wear prevention solutions.
- **Durable Coatings:** Custom coatings tailored to withstand harsh conditions.
- **Customer Satisfaction:** We take pride in delivery projects on time at high quality standards, our skilled team provides regular updates providing transparency and peace of mind.
